About O2 Czech Republic

O2 is the largest operator on the Czech market. It provides voice, internet and data services to customers ranging from households to small and medium-sized businesses to large corporations. O2 always offers the latest technology. Currently, it is building the fifth-generation network (5G), which was the first to launch in the real world. O2 is also the largest internet provider for homes and businesses, covering 99% of addresses. Fixed connection works the best in combination with the O2 Smart Box modem, which has been developed in-house. With its O2 TV service, it is the largest provider of IPTV service in the Czech Republic. O2 has acquired a number of exclusive sports rights for its customers and thus offers the most attractive sports content on the Czech market. The company is one of the largest players in hosting and cloud services, as well as in managed services and ICT. As trends in the telecommunications sector are changing significantly, O2 also focuses on the development and offering of non-traditional telecommunications services. These include, in particular, financial services such as equipment insurance or mobile travel insurance.
