

Municipal Court definitely dismissed legal action of České Radiokomunikace against O2 Czech Republic

August 30, 2016

The legal action of Ceske Radiokomunikace based on claim of recovery of damage and lost profit in the amount of CZK 3,107,900,211 is definitely dismissed. The decision is now in legal force. The legal action was based on argumentation on alleged margin squeeze on broadband services based on xDSL technology which should allegedly cause the damage to Ceske Radiokomunikace. None of these claims was ever proven in the proceedings, nor damage nor any illegal action of O2 Czech Republic was recognized. The legal action is already in legal force and the proceedings therefore successfully closed.

About O2 Czech Republic

O2 is the largest integrated telecommunications provider in the Czech market. At present we operate close to eight million mobile and fixed accesses, which ranks us among the market leaders in fully converged services in Europe. To users of mobile services in the Czech Republic we offer state-of-the-art HSPA+ and LTE technology. We have the most comprehensive proposition of voice and data services in the Czech Republic, and we actively exploit the growth potential of the various business lines, especially ICT. Our data centres, with total floor area of 7,300 square metres, rank us among the leaders in hosting, cloud and managed services. O2 data centres belong to the few commercial ones in Central Europe to have TIER III certification. With our O2 TV we are also the largest IPTV service provider in the Czech Republic.
